Metro 2033 Redux

We are back with another very large training library and free fix for Metro 2033. Unlike the previous version, this trainer has far less bugs so you can't crash the game when using the trainer with the simulator. A fully manual trainer is also included so you can save files and continue your game just like you are playing the game. All your levels are saved, and you can use the replays again in a real game. Many new cheats have been added to this version of the game, just like the previous trainer which is great for those of you with unlimited ammo. The previous version didn't save the files for the first playthrough, which is fixed with the new version. The file names have changed for the player level files, which are now prefixed with "PL". The original trainer also allowed you to use the cheats again with the next playthrough, which is no longer possible. The unlimited ammo cheats have been moved to the save file and you can use this trainer every time you like. - You can find more info about Metro 2033 Trainer 1001 on the trainer's description page in the download section. Check out more training libraries and trainers for PC Games, the version history of Metro 2033 Trainers, and the full list of PC Games supported. Instructions: Click on the green download link for Metro 2033 - v1.0.1.1 Trainer (Manual). Note: If you are still using the manual, please start the manual trainer when you start up the game. Get in game by clicking on the Steam icon on the desktop, then click on "Games". Click on "Activate a Product on Steam" and enter the code "". You should now see a window with "Play Metro 2033" in it. If you already have a save game for Metro 2033 - v1.0, you can continue from there. This trainer will overwrite the save file with a new one with the same name and folder structure. The level files have been renamed so that you can use the trainer again and again. If you haven't yet played the game, you can play it with the trainer. It will create a new save file. The help file has been fixed to display English now. To access the cheat menu, you have to hold Ctrl+Shift and click on the menu icon on the bottom left corner of the screen (the cheats menu should now pop up f678ea9f9e
